

Linking Your Domain to Your Web Hosting Account

1. Look for the email you received from **Host Gator**
2. Write down your name server addresses.
3. Find email from GoDaddy with your customer number and gather the username and password you chose when setting up your domain.
4. Open your browser and go to GoDaddy.com (<http://godaddy.com>).
5. Log in to your account at right-hand side of screen.
6. Click on "**My Account**" in the same right-hand side panel.
7. Click on "**Domains**"
8. Scroll down to "**My Domains**" and click.
9. Click in the box for the domain name you want to set.
10. Click on the icon above that says "**Name Servers.**"
11. Click on button that says "**Custom Name Servers.**"
12. **Highlight the old name server addresses, and delete them.**
13. **Enter the Host Gator name servers** that you wrote down from the Host Gator email.
14. Scroll over and click on "**OK.**"
15. Scroll over again and click "**OK.**"
16. Log out of GoDaddy and close window.
17. It takes up to 48 hours for your name servers to be up and running; however, it could be just a couple of hours.
