

Adding the NinjaResponder Code to Your Blog

- Log into NinjaResponder
- Select the list you want to use
- Go to “List Settings” and “Web Form”
- Click on the “Get HTML” for the form you created in the last video
- Copy the HTML from the second box on the pop-up screen
- Paste the code into a text editor, such as NotePad (Don't use MS Word)
- Log into your blog admin area
- Click on “Presentation” in the title bar
- Click on “Widgets” in the sub-bar
- Drag “Text 1” box to the top of the sidebar area
- Move other widgets into the sidebar, as you see fit. The “Meta” widget is important because it has the link to your login
- Click on “Text 1” box's configure button.
- Copy the opt-in box code from your text editor
- Paste the code into the “Text 1” text box at your blog.
- Close box
- Save sidebar
- Opt in to your list to make sure everything is working properly
- Continue to the next video to create your welcome message
